# What PdfStamper does for you

- add page numbers to a number of pdf files within (source) directory

- it numbers consecutively, starting with page 1

- PdfStamper NEVER modifies the source pdf's – it will ALWAYS copy them (page–by–page) to a target directory and add content only on the newly created copies.

- On the UI, you can configure a file–prefix and page–number–prefix.

Prerequisites

- all pdf files are located within (current or configured) directory

- all pdf files (should currently) have A4 size and portrait orientation

- page bottom has enough free space to add pagenumber and prefix

Limitations

Currently (in release 0.42), PdfStamper cannot:
